I can certainly convene such a meeting but as the suspension was the
action of the Program I think it would be more appropriately called by
the SOM.                                                        4

Max,

Dr. Glickman suggested that there be a meeting with you and Drs. Rackow,
Riles, Ren, Fielding, Levin and Bernstein, and Lynn and me to review the
options here, since each has consequences for the hospital and the GME
program.

Can you convene this?

ette

Lynn
As you can see, they are getting very agitated with our apparent lack of
progress and communication in this matter.  I think Annette or you
should give them a call.
Max

Max,
It's been over 2 weeks and neither George nor I have had any
communication from
ne at the Hospital or at the Medical School voluntarily. All of the
minimal
information that we have is only after George or I initiated a call or
email to

1

you or Tom Riles. George even wrote to you regarding a possible option for a
solution. It would be professional, respectful and appropriate to include
George and I in all progress in this matter. Perhaps non- or ⬤s-communication
⬤ the philosophy of the Medical Center. It certainly seems to be a theme, and
it's very disappointing and very dis-spiriting.
Chris
